Soft Skills

Organized / Structure means everything to me, without structure there are no fundamentals to build on.

Adaptability / It doesn't take me a long time to get a grip on new content or new environments.

Teamwork / My strongest asset, not only am I a very easy person to work with. I also feel that I have the ability to get the most out of my teammates as well.

Leadership / Lead by example is a sentence I take very seriously. By behaving my best I try to motivate others to do the same.
